

## Safety Platform

### Deck Span<sup>®</sup>

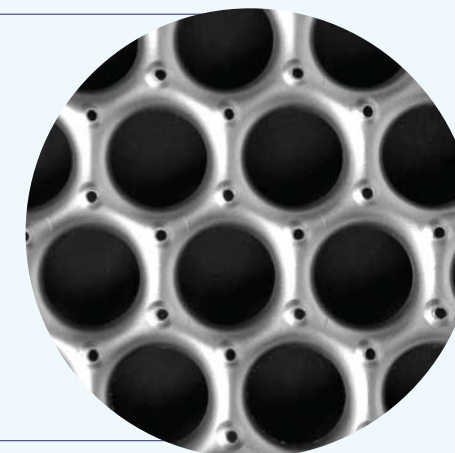

Safety grating's unique diamond design offers 360° slip resistance and outstanding load-carrying capabilities.

## Steps

### Open Grip<sup>®</sup>

Metalex's safety grating solution that includes debossed holes to permit the flow of air, heat and light.

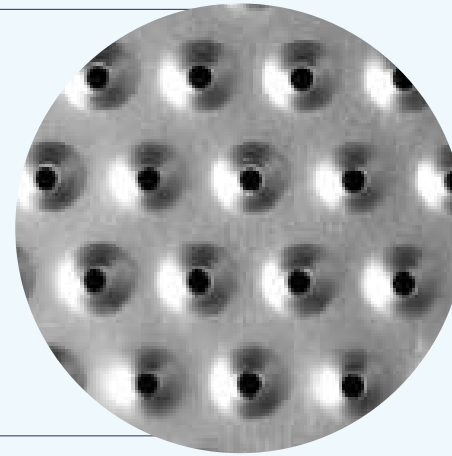

## Ladder Rungs

### Tread-Grip® Flooring

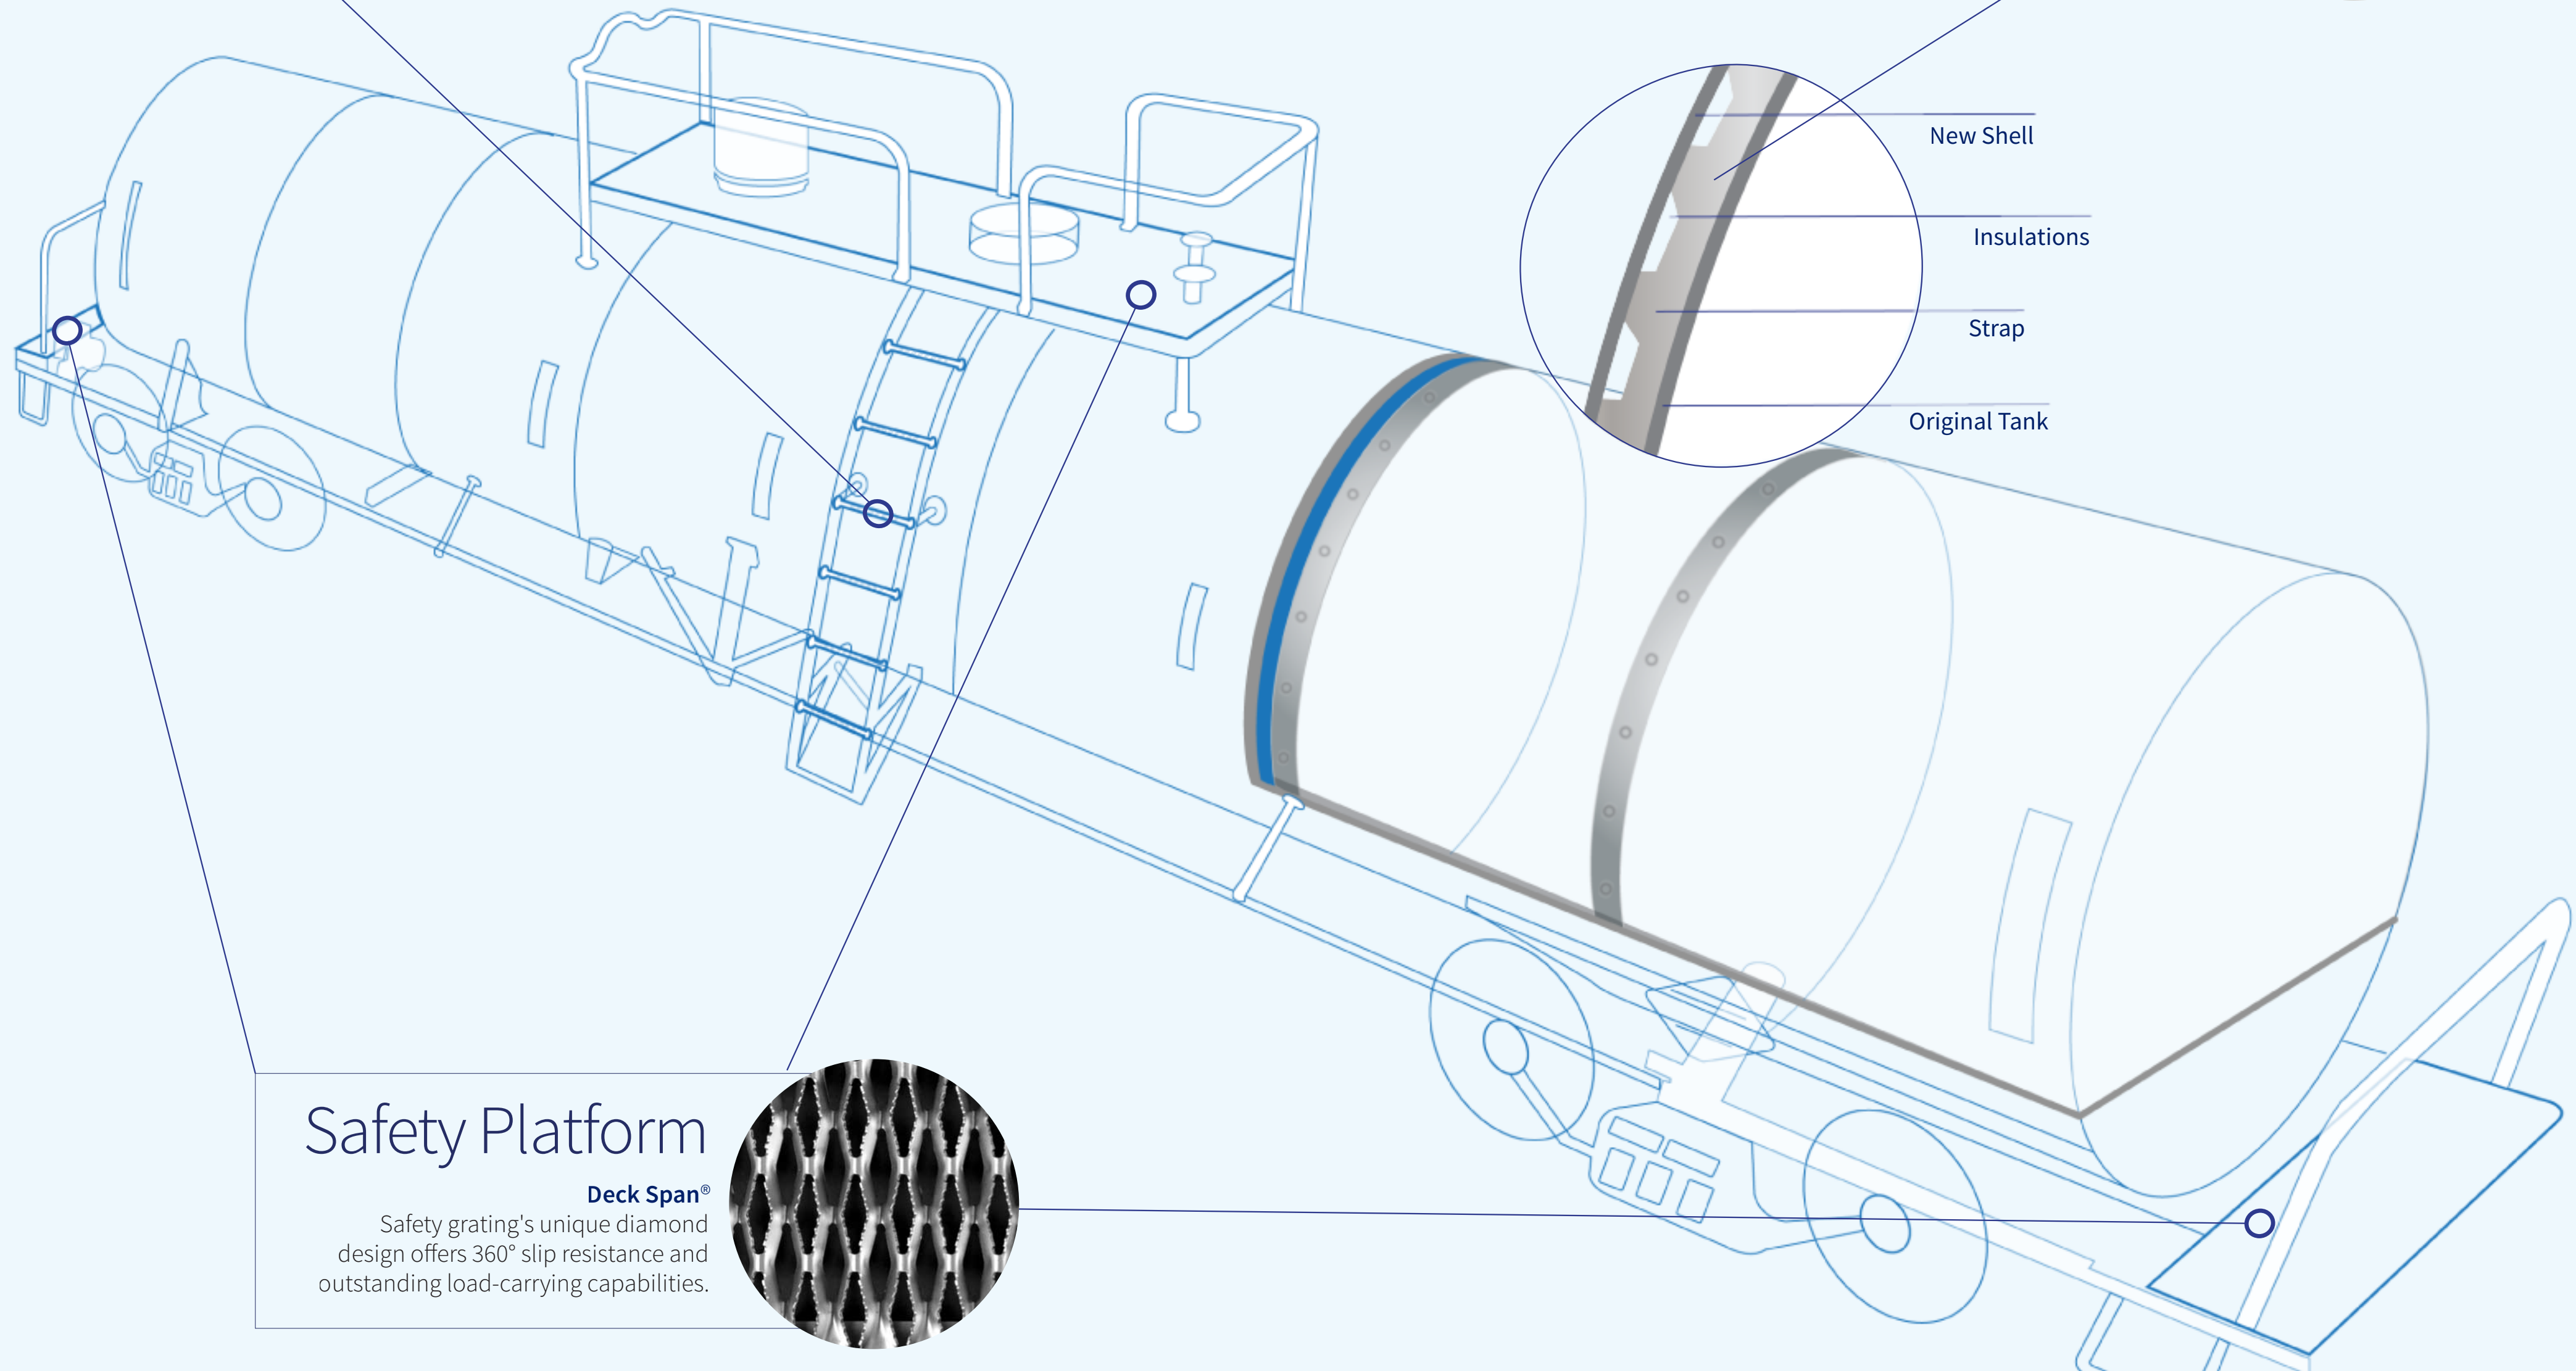

Patterned with closely-spaced perforated buttons, Tread-Grip® provides high-adhesive friction and long service life.

## Tank Strap

### Retrofit Straps

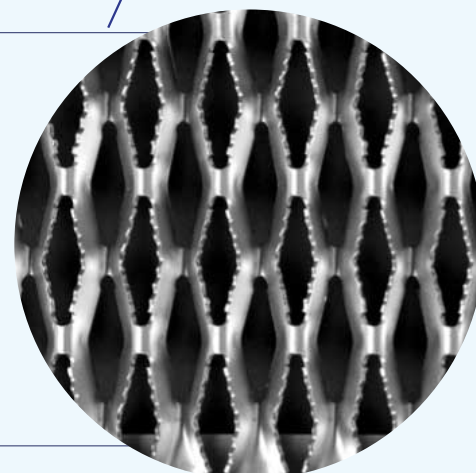

Metalex retrofit bands wrap the tank car's circumference of the car, adding a gap for heat-resistant insulation between the original inner wall and the retrofit outer jacket.

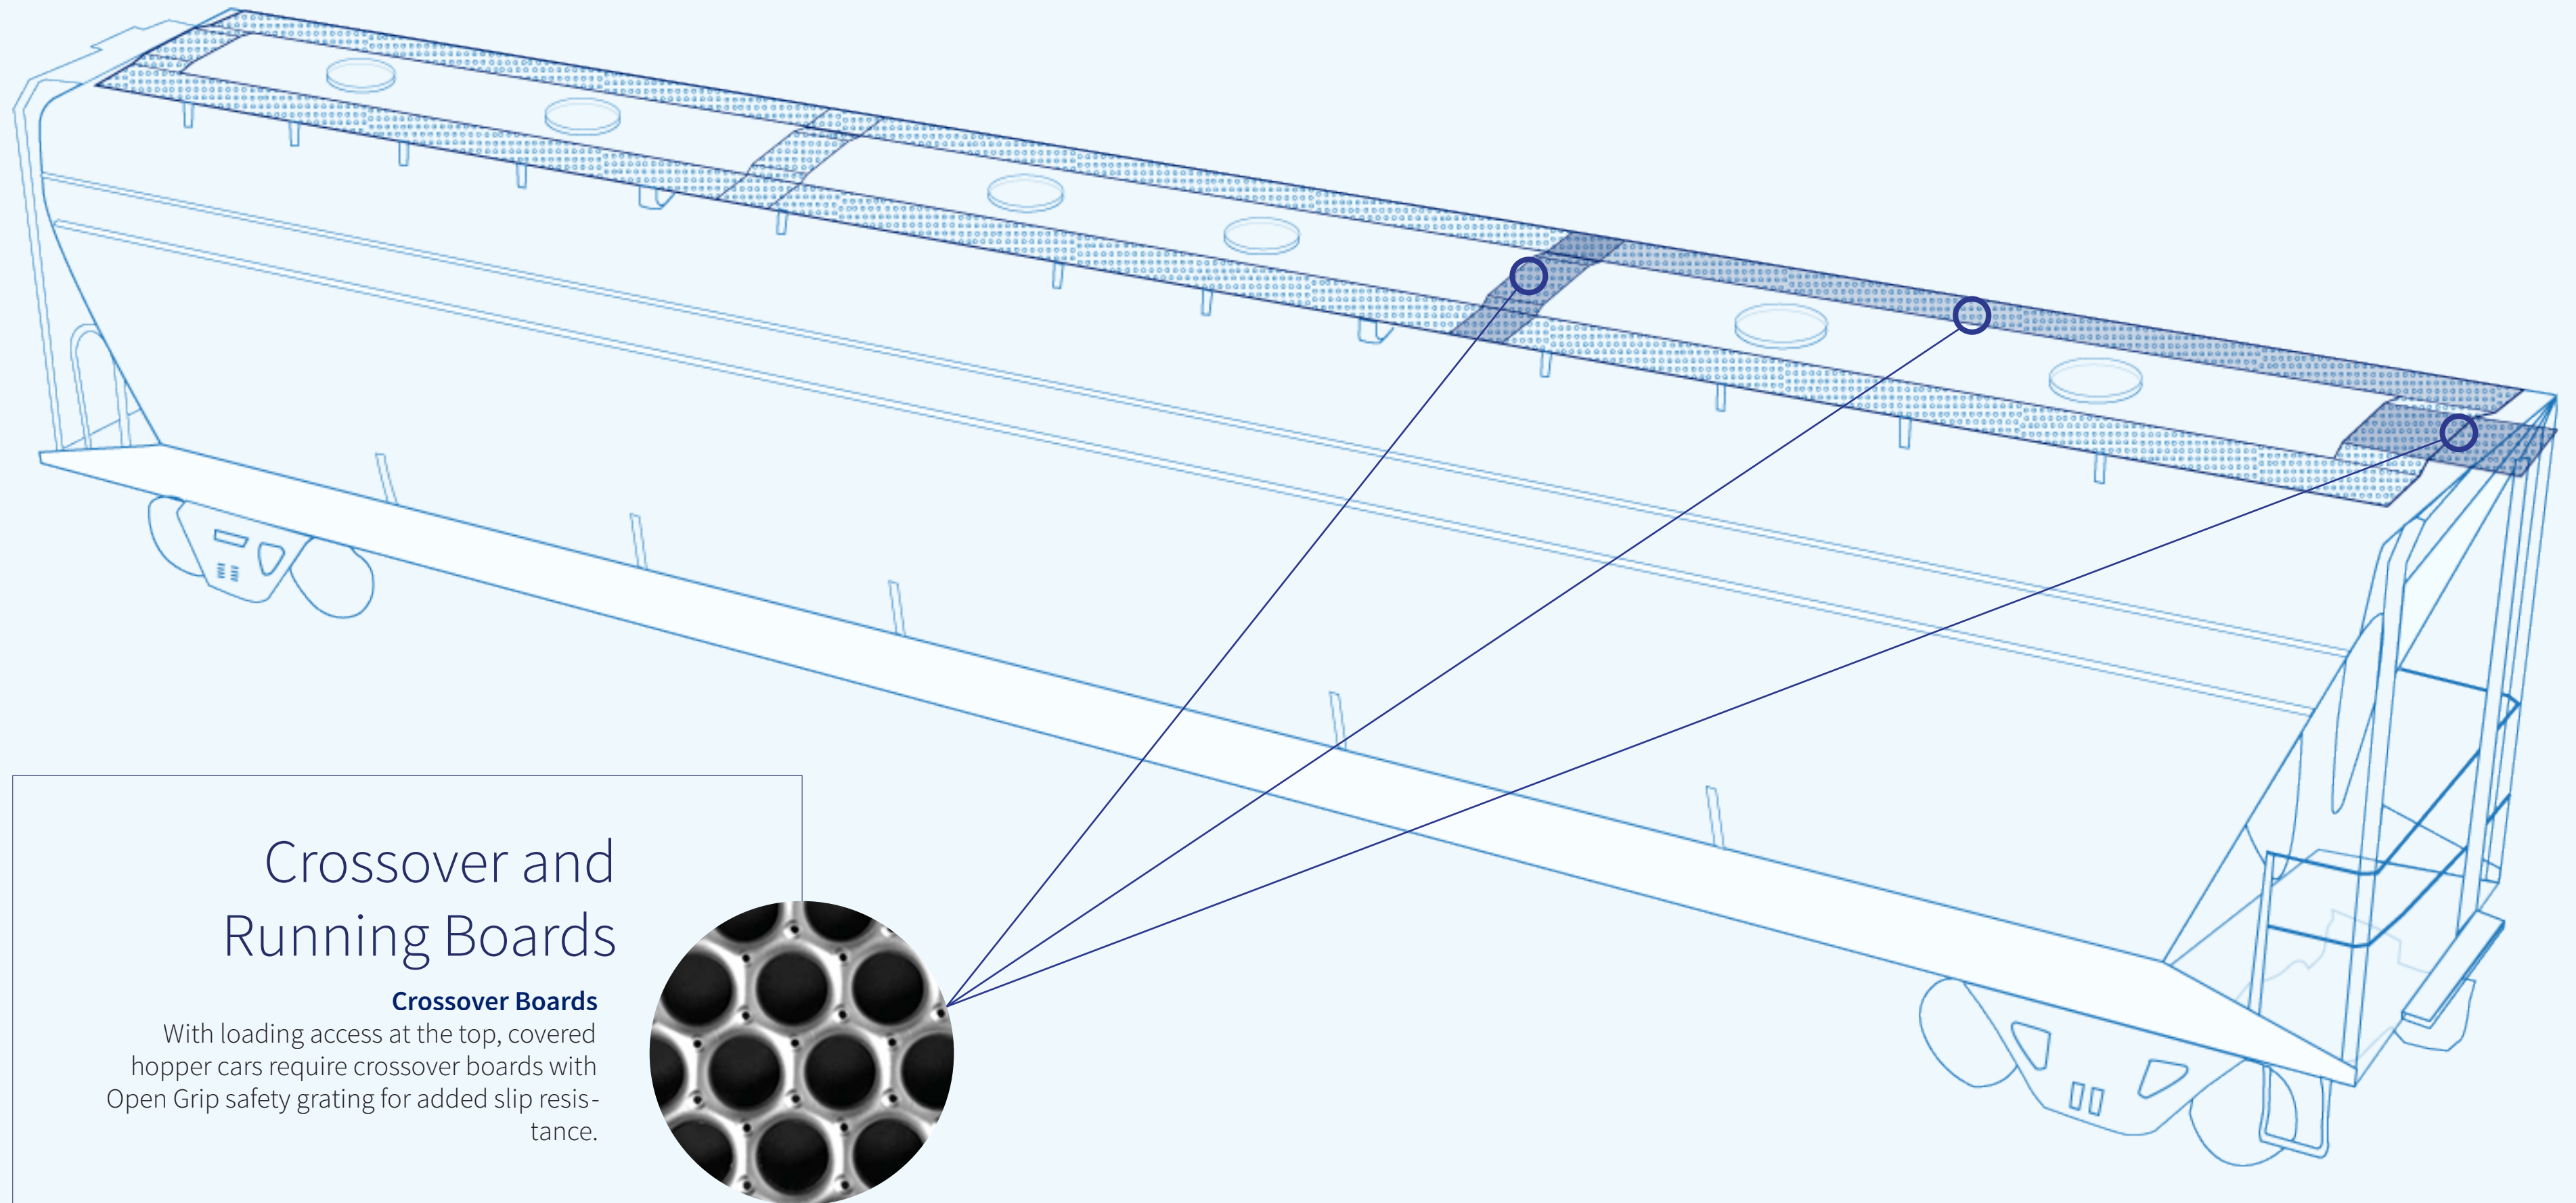

## Safety Platform

### Deck Span®

Safety grating's unique diamond design offers 360° slip resistance and outstanding load-carrying capabilities.

## Crossover and Running Boards

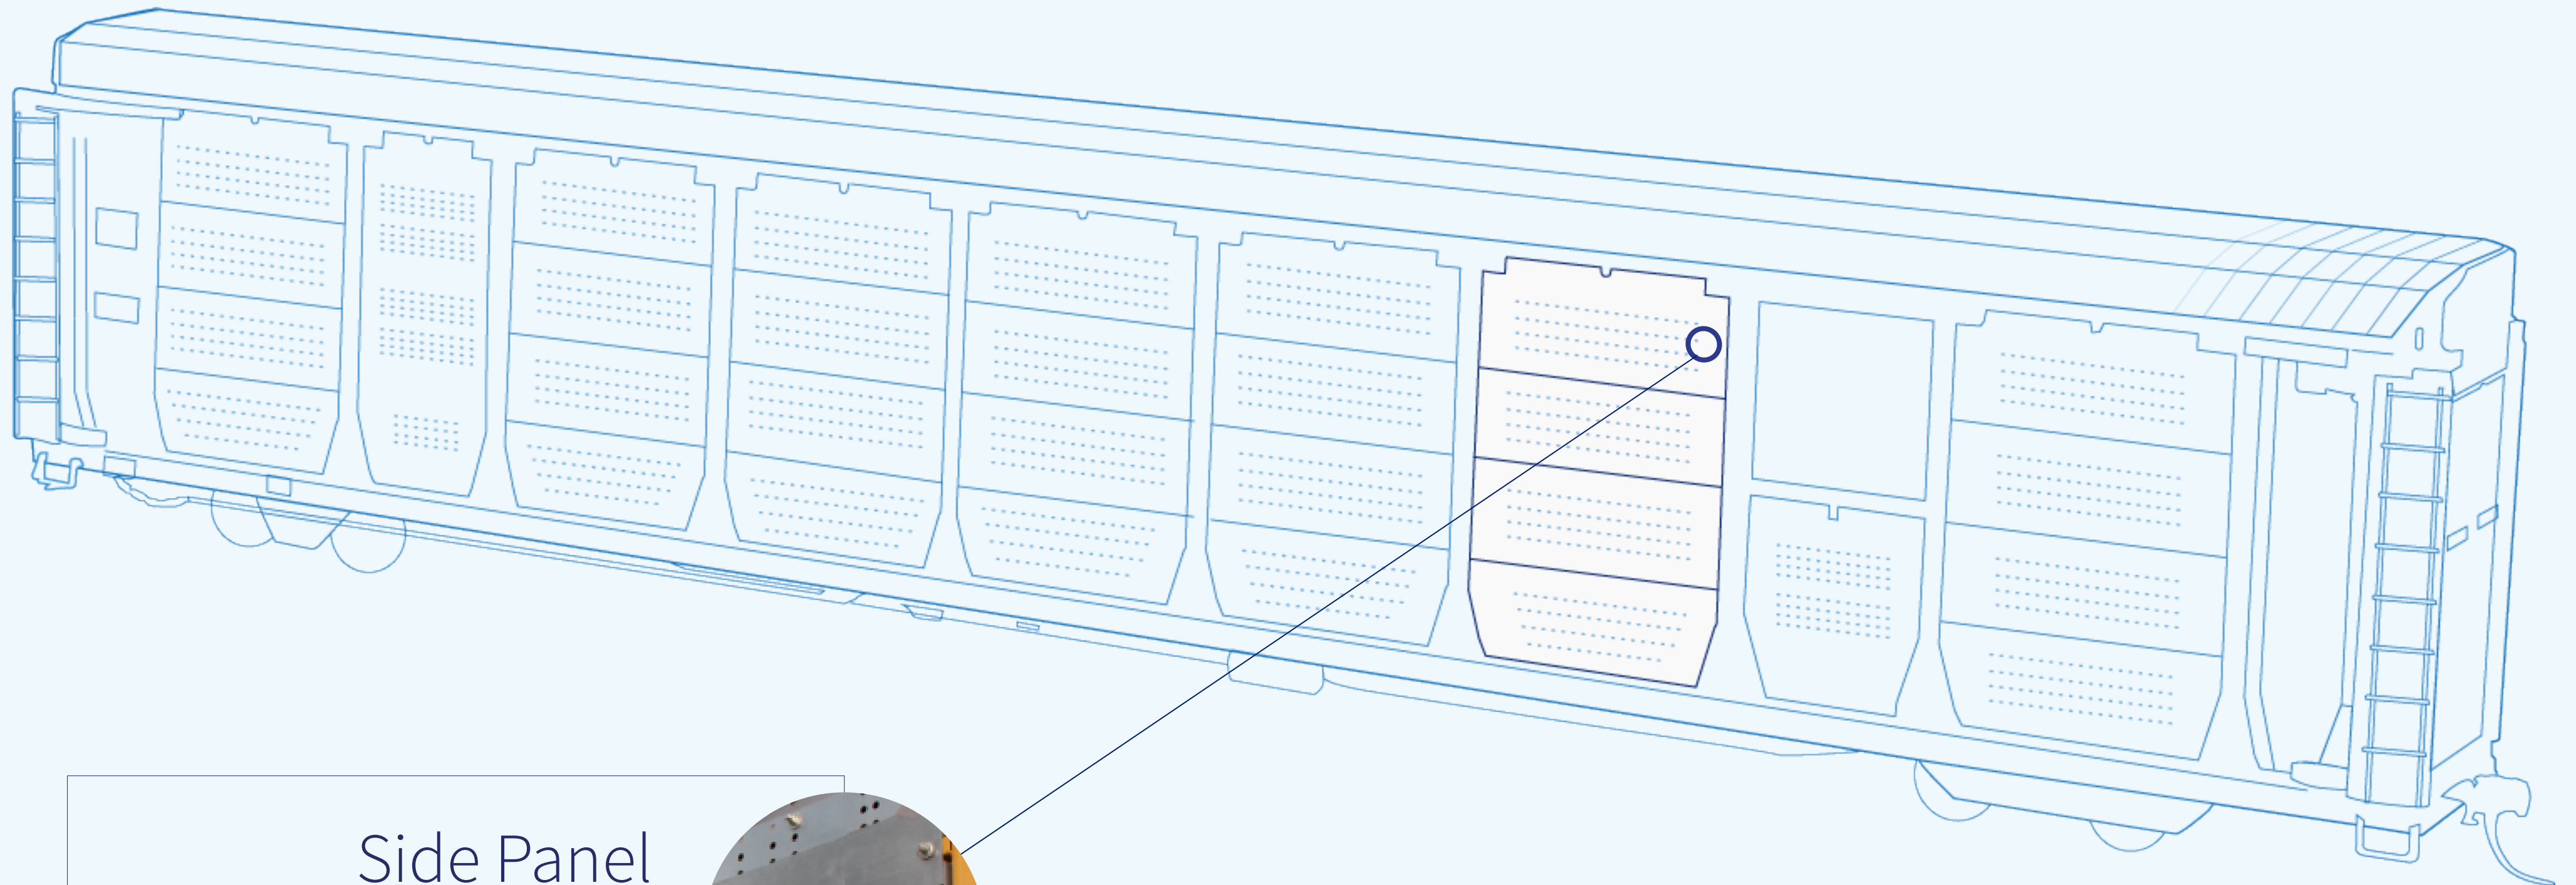

### Crossover Boards

With loading access at the top, covered hopper cars require crossover boards with Open Grip safety grating for added slip resistance.

### End Extension

In addition to crossover boards, Metalex also supplies Open Grip safety grating for hopper

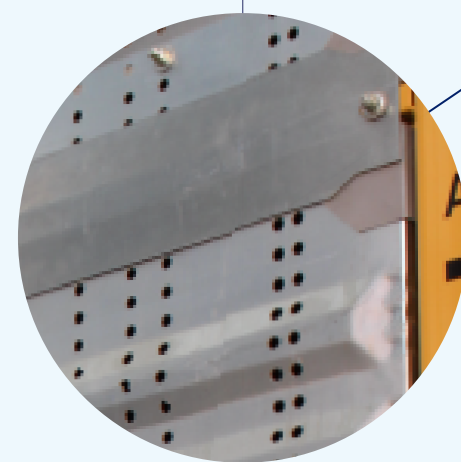

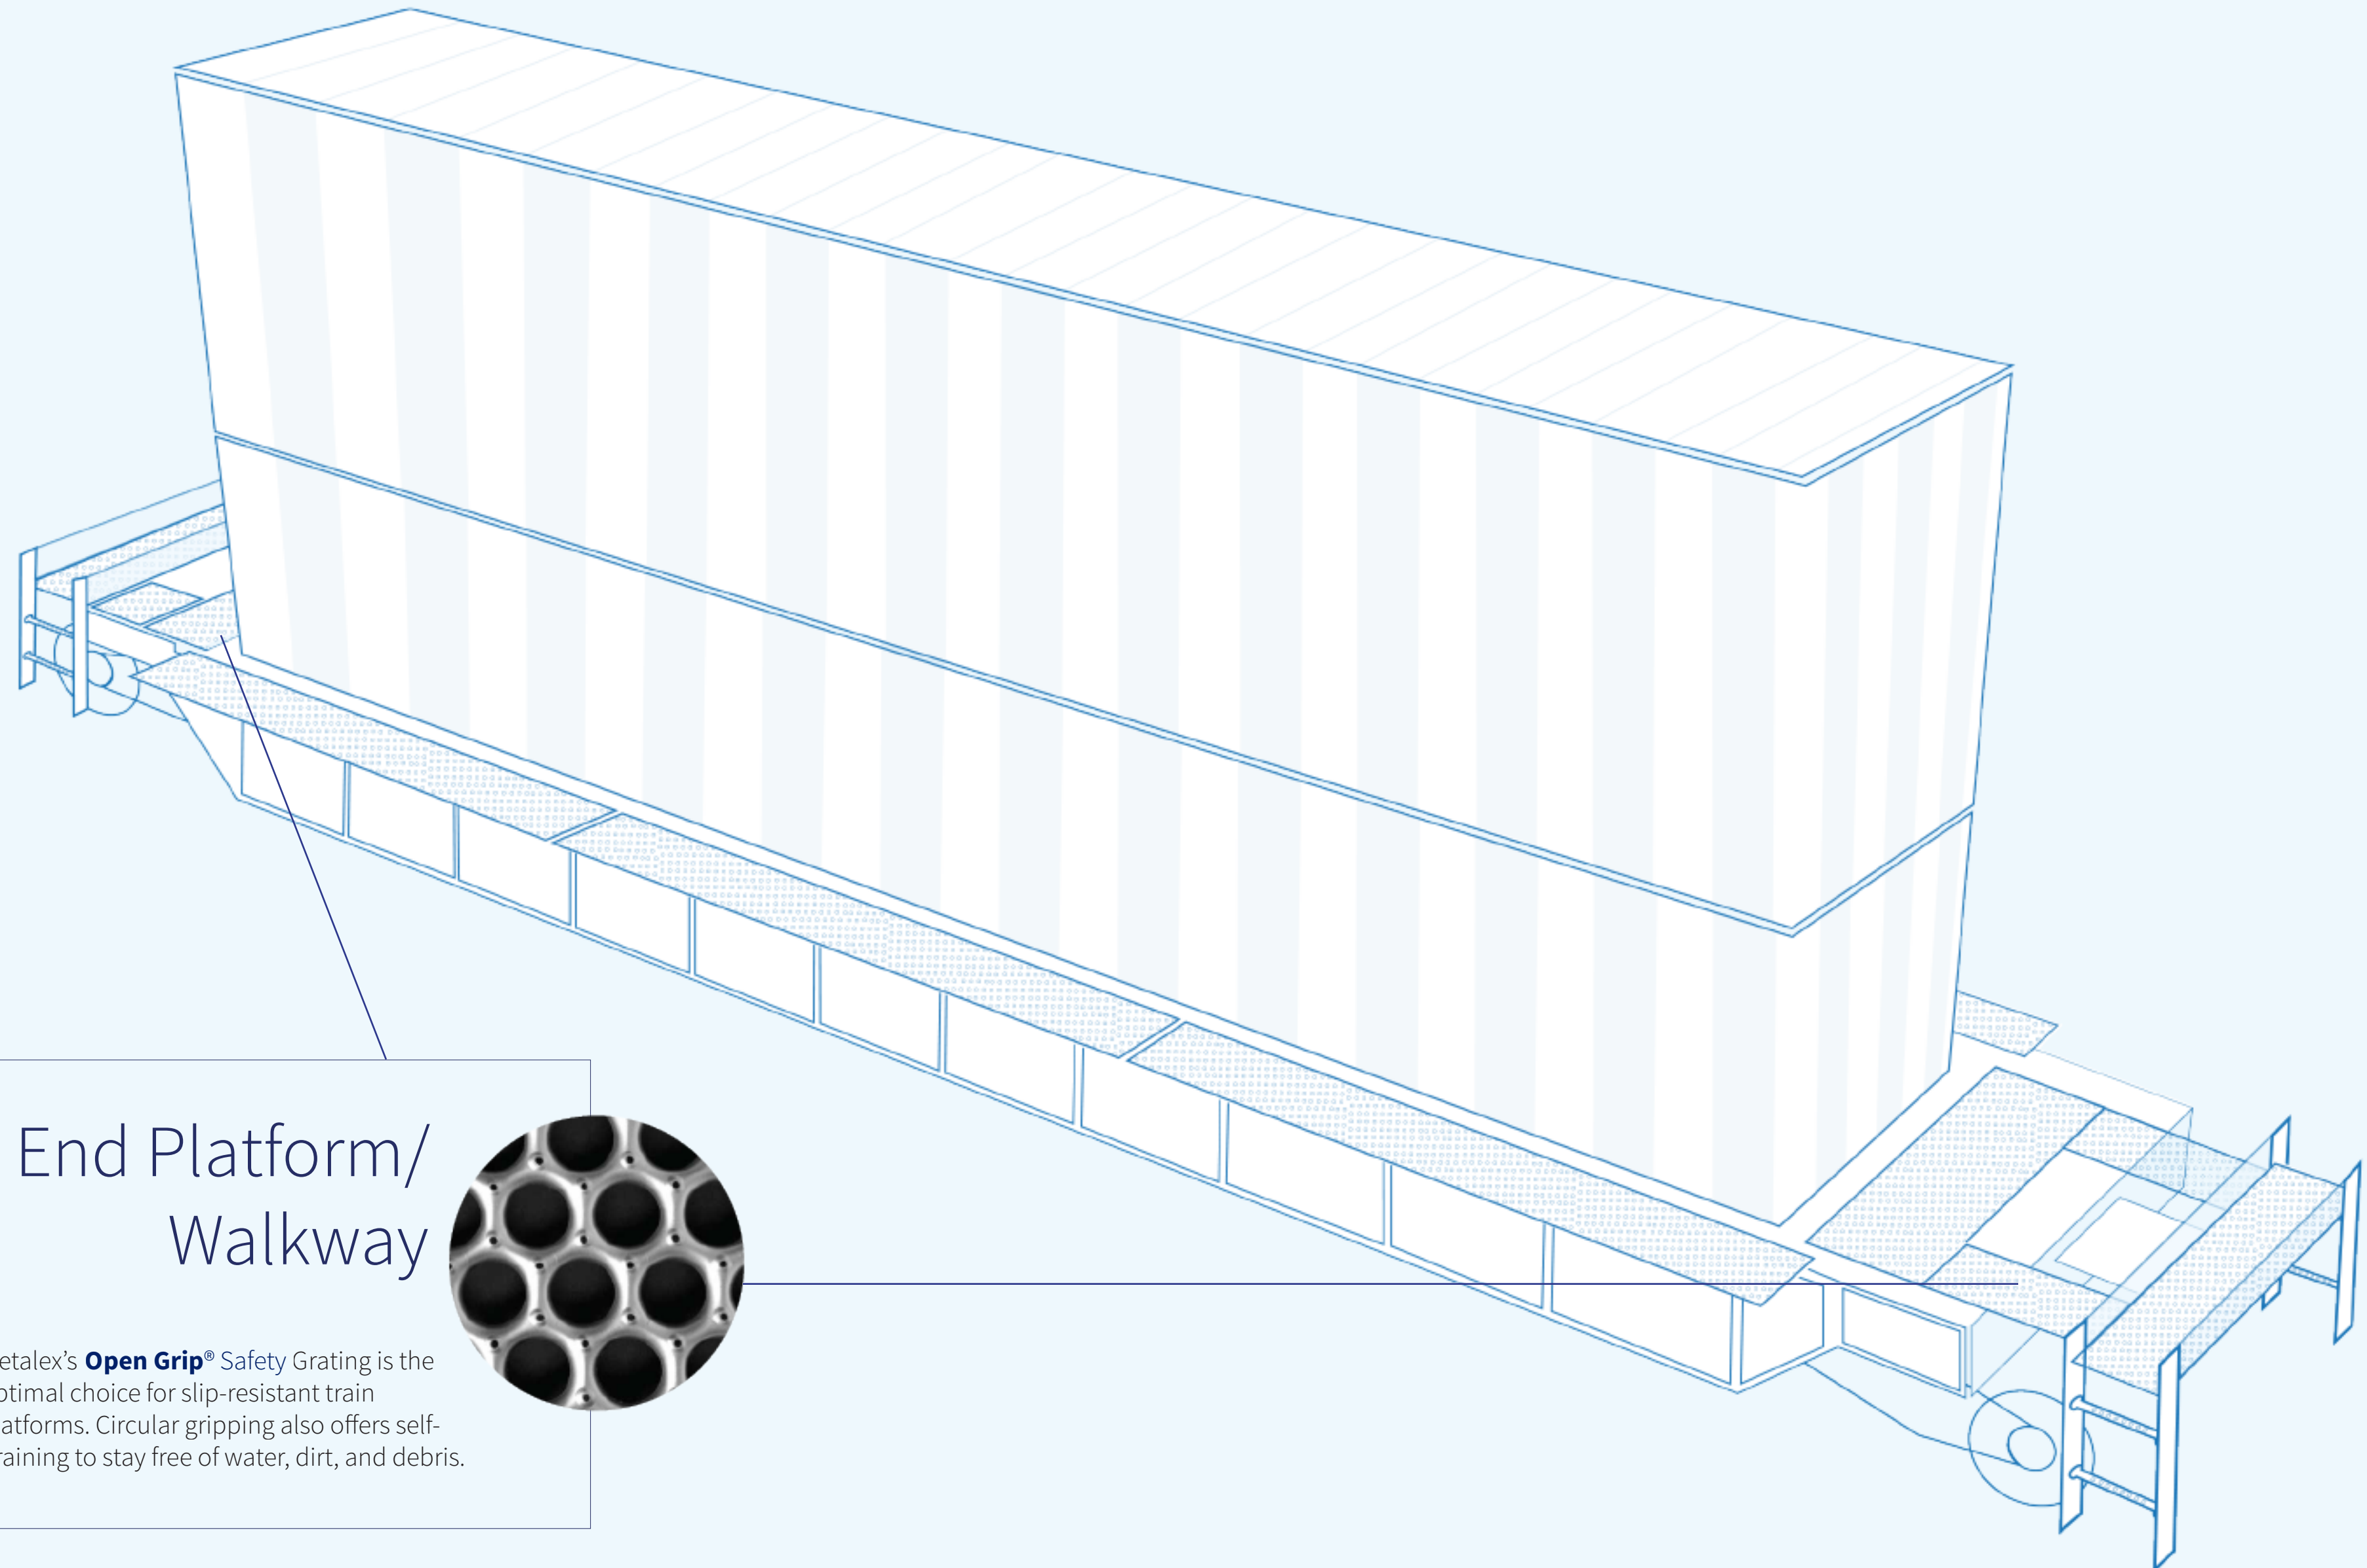

## Side Panel

### **Autorack<sup>®</sup>**

Perforated metal on autorack cars offers added ventilation for freight, plus allows for the passing of light and moisture to prevent rusting.

## End Platform/ Walkway

Metalex's **Open Grip**<sup>®</sup> Safety Grating is the optimal choice for slip-resistant train platforms. Circular gripping also offers self-draining to stay free of water, dirt, and debris.
